

# **Industrial Evolution in the Black Sea Area – Examples from Greece, Romania and Armenia**

## **General Information**

<u>Sector:</u>	Culture
<u>Duration:</u>	24 months
<u>Implementation period:</u>	March 2012 – March 2014
<u>Overall budget:</u>	EUR 248.763

**RA beneficiary organisation:** National Academy of Sciences of the Republic of Armenia  
**Participating countries:** Greece, Romania, Armenia, Macedonia

## **Description of the projects**

Overall Objective: To achieve strong regional partnerships and cooperation among the participant entities and also bring together the peoples of the Black Sea Basin.

### Achieved results:

- A common database on the effects in society (social, economic and cultural) from the industrial evolution through the years was created;
- Three studies (one for each country) that presented the situation and provided the necessary data to create the exhibition were conducted;
- An exhibition for the researchers of industrial history, university students and visitors of the museum (children and adults) on the common elements of industrial evolution was organised.
